ACKNOWLEDGEMENTS

These are the resources and tools that support the successful development of the CRTL+C-YA project.

Dataset:

- GitHub
  - https://github.com/Bharti-Goyal/Twitter-Fake-account-dataset/blob/main/fake_users.csv
  - https://github.com/Vinod-Ghanchi/Social-Media-Fake-Account-Detection/tree/main/Dataset
  - https://github.com/LeadingIndiaAI/Detecting-Fake-Profiles-On-Social-Media/tree/master/dataset
  - https://github.com/harshitkgupta/Fake-Profile-Detection-using-ML/blob/master/data/fusers.csv
- Web-Scrapping Sources
  - https://instrack.app/top-accounts
  - https://viralpitch.co/topinfluencers/top-100-instagram-influencers-in-us/
  - https://www.hopperhq.com/instagram-rich-list/

Libraries and Documentation:

- pandas documentation (data manipulation and analysis)
- NumPy documentation (data manipulation and analysis)
- Selenium (web-scraping)
- BeautifulSoup (web-scraping)
- Matplotlib (data visualization)
- Seaborn (data visualization)
- Sckit-learn (machine learning models)
- Flask (web application development)
- CSS (web application development template styling)
- HTML (web application development template functions)
- Difflib (web development for string matching similarity)
- Plolty documentation (data visualization)

Youtubes & Source Tutorial

- https://www.youtube.com/watch?v=bMTl6ZDUMqM (cleaning data)
- https://www.youtube.com/watch?v=YnggjqAfZCU (rename column in dataset)
- https://www.youtube.com/watch?v=TPivN7tpdwc (merge dataset)
- https://www.youtube.com/watch?v=_SA80Rn9bpo (selenium tutorial)
- https://www.youtube.com/watch?v=mqhxxeeTbu0 (flask website tutorial)
- https://www.youtube.com/watch?v=2YOBmELm_v0 (flask tutorial)
- https://www.youtube.com/watch?v=UaPE4OmEJCU (seaborn tutorial)
- https://medium.com/@zhangkd5/a-tutorial-for-difflib-a-powerful-python-standard-library-to-compare-textual-sequences-096d52b4c843 (difflib tutorial)
- https://www.youtube.com/watch?v=rAXpKqCzwK8 (difflib tutorial)

- https://www.youtube.com/watch?v=dsZ7RN9ItR4 (CSS tutorial for glass effect)
- https://www.youtube.com/watch?v=Tkph7eiceQE (glassmorphism tutorial)
- https://www.youtube.com/watch?v=SBnM3HGjwf4 (glassmorphism tutorial)

AI Tools

- ChatGPT (Open AI)
  Used for:
  - Python code debugging
- Gemini AI
  Used for:
  - Support in creating web background images.
  - Generate citation for any research pdf lacking direct source links.
  - Finding direct sources link for CSS and HTML templates tutorial when standard search results were insufficient.

Example AI input:

- Locate CSS sources to create a glassmorphism effect for a survey UI.
- Interpret this error feedback message.
- Where is the exact line of code in style.css causing this runtime error?

Notes:
AI tools were used as supplemental resources to gain knowledge, debugging, and creating images that cannot be found on google searching. All codes, data analysis, and project research or conclusions are original work, reflecting my own skill in data science, and new knowledge from consuming old and new resources.
